

INVENTORY OF POLICY & GUIDELINES REGARDING RESEARCH DATA COLLABORATION

PERIOD

May - October

1st Meeting

22 May 10.00-12.00
hrs SURF Utrecht

BACKGROUND

Many research projects are institute transcending. Although not connected with the same institute, collaborative partners need access to research data and resources. This is not always simple in practice because of incompatible conditions and guidelines imposed by different institutes.

WHY IS THIS IMPORTANT?

If not well-coordinated, ever more stringent provisions for research and research data may hamper collaboration, while the importance of institute transcending research continues to grow

ACTIONPLAN

- Draw up an inventory of institute transcending research projects (use cases)
- Call attention to hindrances
- Map which incompatible policies causes obstacles
- Describe implications and solutions

JOIN THE TASK GROUP IF YOU ARE

- RDM specialist
- RDM support staff
- data steward
- security office
- privacy officer
- research policy advisor
